Float -HIPS (High impact polystyrene) – 99%, Additives and colorants- 0-10%.

This product is not classified as dangerous according to Regulation

The product does not meet the criteria for PBT or vPvB classification.

Provide fresh air. In case of noticing worrying symptoms, consult a physician

If molten material comes into contact with the skin, cool immediately with cold water. Removal of solidified molten material from skin as well as treatment of

Immediately rinse eyes with water. In case of irritation, contact a physician

Remove material residues from mouth and rinse mouth with water. Drink plenty of water. Do NOT induce vomiting. In case of discomfort, contact a physician.

Fine spray or water mist, dry powder, foam, carbon dioxide (Co2).

Special exposure hazards arising from the substance or preparation itself,

fumes/gases, smoke, carbon monoxide, carbon dioxide, hydrocarbons

combustion products, resulting gases: burning produces irritating and noxious

Special protective equipment for firefighters - self-contained breathing apparatus

Use personal protective equipment. Avoid contact with eyes and skin. Do not breathe vapors. In case of failure in a confined space, ensure proper ventilation.

Prevent or limit further leakage if possible. Avoid discharge of the product into

Sweep up and gather solidified material into appropriate containers for disposal.

Handle in accordance with general safety regulations. Use personal protective equipment. Ensure proper ventilation. Avoid contact with molten material. Do not

Store in tightly closed packaging in a dry and cool room away from hot surfaces

The product does not contain any hazardous substances with occupational

Appropriate engineering controls: Store at temperatures between 20 °C and 30 °C. Ensure proper ventilation, especially in confined spaces. Individual protection

when working in spaces with high temperatures and ventilation use breathing

EVA (Ethylene Vinyl Acetate)

PRODUCT DESCRIPTION

EVA (Ethylene Vinyl Acetate) foam can be used in a wide variety of applications. It is a closed cell, cross-linked EVA copolymer foam producing an environmentally friendly product with low VOCs. High durability and sturdiness even at extremely low temperatures. Water-resistant properties Since EVA foam is highly durable and sturdy, it is able to withstand strong forces. It is also weather-resistant and is able to withstand some other harmful agents such as fuel oils and chemicals. High chemical resistance -This feature makes EVA foam awesome for all kinds of toxic situations. It's highly resistant to dilute acids, dilute alkalis, oils and greases, aliphatic hydrocarbons and alcohols.

heated up, may cause burns.

possible. Seek immediate medical attention

Wash mouth and seek medical advice

Use foam, carbon dioxide, dry chemicals.

Ethylene Vinyl Acetate copolymers, Fillers, Lubricants, Curatives

Not harmful to health or environment under normal use of product. If material is

Does emit odours if sealed and exposed to higher temperature when unwrapped.

Not expected to present a significant skin hazard under anticipated conditions of normal use. Any heated/molten material on skin should be cooled as fast as

Combustible - will burn if exposed to naked flame. Not consider a fire risk.

Provision should be made for sufficient ventilation and local exhaust where

Store in a dry well-ventilated area away from direct sunlight, heat and ignition

source. The appropriate company regulation for the fire prevention are to be

dust/fumes may be produced Avoid dust generation

followed. Keep away from strong oxidising agent.

Contact with source of ignition. Decomposition above 300°C.

The product will not undergo hazardous polymerisation.

Dispose according to local regulation. Recycle is possible.

Material is classified as non-hazardous i.e. not comes under DGR.

In normal use no toxicological effects are known.

Material is inert and insoluble in water.
